Volume Contents

Number 1. July

The Metabolism of Organic Acids by a Marine Pennate Diatom. KEITH E. COOKSEY 1

The Nutritional Role of Pistil Exudate in Pollen Tube Wall Formation in *Lilium longiflorum*. I. Utilization of Injected Stigmatic Exudate. C. LABARCA AND F. LOEWUS 7

Indoleacetic Acid Oxidase: A Dual Catalytic Enzyme? M. C. HOYLE 15

Protein Synthesis by Isolated Etioplasts and Chloroplasts from Pea and Wheat and the Effects of Chloramphenicol and Cycloheximide. BONNIE J. REGER, R. M. SMILLIE, AND R. C. FULLER 19

Light-stimulated Production of a Chloroplast-localized System for Protein Synthesis in *Euglena gracilis*. BONNIE J. REGER, R. M. SMILLIE, AND R. C. FULLER 24

A Re-evaluation of Soybean Leaf Photorespiration. Y. B. SAMISH, J. E. PALLAS, JR., G. M. DORNHOFF, AND R. M. SHIBLES 28

Lipid Composition of Pea and Bean Leaves during Chloroplast Development. P. G. ROUGHAN AND N. K. BOARDMAN 31

Control and Kinetics of Branch Root Formation in Cultured Root Segments of *Haplopappus ravenii*. L. M. BLAKELY, SHIRLEY J. RODAWAY, LAUREN B. HOLLEN, AND SUSAN G. CROKER 35

An Intermediate in the Synthesis of Glucobrassicins from 3-Indoleacetaldoxime by Woad Leaves. S. MAHADEVAN AND BRUCE B. STOWE 43

Intracellular Distribution of Mitochondria after Geotropic Stimulation of the Oat Coleoptile. J. SHEN-MILLER AND CAROL MILLER 51

Isolation of Plastids from Sunflower Cotyledons during Germination. C. SCHNARRENBERGER, A. OESER, AND N. E. TOLBERT 55

Boundary Layer Resistance and Temperature Distribution on Still and Flapping Leaves. II. Field Experiments. JEAN-YVES PARLANGE AND PAUL E. WAGGONER 60

Radial Transport of Sodium and Chloride into Tomato Root Xylem. E. V. MAAS AND GEN OGATA 64

Sterol Changes during Germination of *Nicotiana tabacum* Seeds. PARSHALL B. BUSH AND C. GRUNWALD 69

Changes in the Ribonuclease Activity of Flax Cotyledons following Inoculation with Flax Rust. LEROY A. SCRUBB, ARUN K. CHAKRAVORTY, AND MICHAEL SHAW 73

The Relative Amounts and Identification of Some 2,4-Dichlorophenoxyacetic Acid Metabolites Isolated from Soybean Cotyledon Callus Cultures. CHAO-SHIEUNG FEUNG, ROBERT H. HAMILTON, FRANCIS H. WITHAM, AND RALPH O. MUMMA 80

Effects of Hydroxylamine on Photosystem II. II. Photoreversal of the NH_2OH Destruction of O_2 Evolution. G. M. CHENIAE AND I. F. MARTIN 87

The Respiratory Chain of Plant Mitochondria. XIV. Ordering of Ubiquinone, Flavoproteins, and Cytochromes in the Respiratory Chain. BAYARD T. STOREY AND JAMES T. BAHR 95

The Influence of Gibberellic Acid on the Permeability of Model Membrane Systems. A. WOOD AND L. G. PALEG 103

Comparison of the Effectiveness of Glycolic Acid and Glycine as Substrates for Photorespiration. ISRAEL ZELITCH 109

Comparison of Zeatin Indoleacetate with Zeatin and Indoleacetic Acid in the Tobacco Bioassay. RUTH Y. SCHMITZ, FOLKE SKOOG, SIDNEY M. HECHT, AND NELSON J. LEONARD 114

Effect of Ethylene on Cell Division and Deoxyribonucleic Acid Synthesis in *Pisum sativum*. AKIVA APELBAUM AND STANLEY P. BURG 117

Effects of Ethylene and 2,4-Dichlorophenoxyacetic Acid on Cellular Expansion in *Pisum sativum*. AKIVA APELBAUM AND STANLEY P. BURG 125

Relation of Phytochrome-enhanced Geotropic Sensitivity to Ethylene Production. BIN G. KANG AND STANLEY P. BURG 132

The Gas Exchange of Hydrogen-adapted Algae as Followed by Mass Spectrometry. TIM S. STUART AND HANS GAFFRON 136

The Development of Photosynthesis in a Greening Mutant of *Chlorella* and an Analysis of the Light Saturation Curve. H. A. HERRON AND D. MAUZERALL 141

Photosynthesis in Eurasian Watermilfoil (*Myriophyllum spicatum* L.). R. A. STANLEY AND A. W. NAYLOR 149

Polyamines in Soybeans. L. C. WANG 152

Promotion of Peroxidase Activity in the Cell Wall of *Nicotiana*. WERNER J. MEUDT AND KATHLEEN J. STECHER 157

Biochemical and Biophysical Characteristics of a Photosynthetic Mutant of *Euglena gracilis* Blocked in Photosystem II. FAYE D. SCHWELITZ, R. A. DILLEY, AND F. L. CRANE 161

Structural Characteristics of a Photosynthetic Mutant of *Euglena gracilis* Blocked in Photosystem II. FAYE D. SCHWELITZ, R. A. DILLEY, AND F. L. CRANE 166

Effects of Medium Composition and Carbon Dioxide on Circadian Conidiation in *Neurospora*. MALCOLM L. SARGENT AND SARA H. KALTENBORN 171

Purification and Partial Characterization of a Glucan Containing Indole-3-acetic Acid. ZDZISLAW PISKORNIK AND ROBERT S. BANDURSKI 176

Action Spectrum of Cytochrome *f* Photooxidation in Greening Bean Leaves. R. G. HILLER AND N. K. BOARDMAN 183

The Biosynthesis of Metal Porphyrins by Subchloroplastic Fractions. CONSTANTIN A. REBEIZ, JULIAN C. CRANE, AND CHIC NISHIJIMA 185
Equal Quantal Spectra for the Effect of Light on the Growth of Conidiophores and for the Induction of a Circadian Rhythm of Zonation in *Sclerotinia fructicola* (Wint.) Rehm. STEPHAN JEREBZOFF AND ROGER JACQUES 187
In Situ Measurement of Root-Water Potential. EDWIN L. FISCUS 191
Effect of Abscisic Acid and Its Interactions with Other Plant Hormones on Ethylene Production in Two Plant Systems. EITAN GERTMAN AND YORAM FUCHS 194
Solute Potentials of Sucrose Solutions. BURLYN E. MICHEL 196
The Activity of β-Ecdysone in Four Gibberellin Bioassays. STEPHEN D. HENDRIX AND RUSSELL L. JONES 199
Instructions for Contributors to Plant Physiology i
Symbols and Abbreviations Commonly Used in Plant Physiology iii

Number 2. August

Antagonistic Effects of High and Low Temperature Pretreatments on the Germination and Pregermination Ethylene Synthesis of Lettuce Seeds. A. N. BURDETT 201
Effect of Cetyltrimethylammonium Bromide on the Activity of Particulate Starch Synthetase from Potato Tuber. NELLY LAVINTMAN AND CARLOS E. CARDINI 205
Obligatory Reduction of Ferric Chelates in Iron Uptake by Soybeans. RUFUS L. CHANEY, JOHN C. BROWN, AND LEE O. TIFFIN 208
Plant Carbonic Anhydrases. I. Distribution of Types among Species. C. A. ATKINS, B. D. PATTERSON, AND D. GRAHAM 214
Plant Carbonic Anhydrases. II. Preparation and Some Properties of Monocotyledon and Dicotyledon Enzyme Types. C. A. ATKINS, B. D. PATTERSON, AND D. GRAHAM 218
Inhibition of Ribulose 1,5-Diphosphate Carboxylase by 6-Phosphogluconate. DOUGLAS K. CHU AND J. A. BASSHAM 224
Amino Acid Biosynthesis by Isolated Chloroplasts during Photosynthesis. PAUL R. KIRK AND RACHEL M. LEECH 228
Phytochrome-controlled Nyctinasty in *Albizzia julibrissin*. IV. Auxin Effects on Leaflet Movement and K Flux. RUTH L. SATTER, PHILIP MARINOFF, AND ARTHUR W. GALSTON 235
Microbody Enzymes and Carboxylases in Sequential Extracts from C_4 and C_3 Leaves. A. H. C. HUANG AND HARRY BEEVERS 242
Phytochrome Transformation in Lettuce Seed Irradiated at Various Temperatures. WILLIAM VIDAVER AND ANDREW I-HSIUNG HSIAO 249
Influence of Light Intensity on Reductive Pentose Phosphate Cycle Activity during Photoheterotrophic Growth of *Rhodospirillum rubrum*. J. PORTER AND M. J. MERRETT 252
Multiple Forms of Glucosephosphate Isomerase in Maize. F. SALAMINI, C. Y. TSAI, AND O. E. NELSON 256
Phytochrome Control of Growth Cessation and Initiation of Cold Acclimation in Selected Woody Plants. B. J. WILLIAMS, JR., N. E. PELLETT, AND R. M. KLEIN 262
Translocation of Photosynthate in Curly Top Virus-infected Tomatoes. N. J. PANOPOULOS, G. FACCIOLI, AND A. H. GOLD 266
Effect of Transpiration-reducing Chemicals on Growth, Flowering, and Stomatal Opening of Tomato Plants. D. MISHRA AND G. C. PRADHAN 271
Isolation of an Enzyme System Which Will Catalyze the Glycosylation of Extensin. ARTHUR L. KARR, JR. 275
Estimation of the Transport and Carboxylation Components of the Intracellular Limitation to Leaf Photosynthesis. H. G. JONES AND R. O. SLATYER 283
Effect of Light and Gibberellin on Ribonucleic Acid Species of Pea Stem Tissues as Studied by Deoxyribonucleic Acid-Ribonucleic Acid Hybridization. WILLIAM F. THOMPSON AND ROBERT CLELAND 289
Volatile Metabolites Controlling Germination in Buried Weed Seeds. ROBERT E. HOLM 293
Mitochondrial Tyrosyl Transfer Ribonucleic Acid in Soybean Seedlings. RON L. MENG AND LARRY N. VANDERHOEF 298
False Broomrape: A Physiological Disorder Caused by Growth-Regulator Imbalance. JAMES L. HAMILTON, RICHIE H. LOWE, AND FOLKE SKOOG 303
Mechanism of the Photochemical Activity of Isolated Chloroplasts. VII. Inactivation of a Photoact by Dilute Ferricyanide Ion. FERGUS MACDOWALL AND RUFUS LUMRY 305
Mitotic Index and Cell Cycle of *Lemna perpusilla* under Different Photoperiods. RUTH HALABAN 308
Internal Ethylene Levels during Ripening and Climacteric in Anjou Pears. C. Y. WANG AND W. M. MELLENTHIN 311

Number 3. September

Abscission: Potentiating Action of Auxin Transport Inhibitors. PAGE W. MORGAN AND JAMES I. DURHAM 313
Isolation and Properties of Deoxyribonucleic Acid from Protoplasts of Cell Suspension Cultures of *Ammi visnaga* and Carrot (*Daucus carota*). K. OHYAMA, O. L. GAMBORG, AND R. A. MILLER 319
Auxin Transport: A New Synthetic Inhibitor. ELMO M. BEYER, JR. 322
Investigations of Canavanine Biochemistry in the Jack Bean Plant, *Canavalia ensiformis* (L.) DC. II. Canavanine Biosynthesis in the Developing Plant. GERALD A. ROSENTHAL 328
Effect of Time, Water Flow, and pH on Centripetal Passage of Radiophosphorus across Roots of Intact Plants. FRED H. EMMERT 332

The Distribution of Carbonic Anhydrase and Ribulose Diphosphate Carboxylase in Maize Leaves. RAYMOND P. POINCELOT 336
Interrelationships of Ethylene and Abscisic Acid in the Control of Rose Petal Senescence. S. MAYAK AND A. H. HALEVY 341
Phosphate-induced Stimulation of Acceptorless Respiration in Corn Mitochondria. J. B. HANSON, B. L. BERTAGNOLLI, AND W. D. SHEPHERD 347
Adaptation to Quantum Flux by the Emerson Photosynthetic Unit. R. P. SHERIDAN 355
Dark Fixation of CO_2 by Crassulacean Plants. Evidence for a Single Carboxylation Step. B. G. SUTTON AND C. B. OSMOND 360
Phloem Translocation and Heat-induced Callose Formation in Field-grown *Gossypium hirsutum* L. ROBERT B. MCNAIRN 366
The Formation of β, 1 $\rightarrow$ 4 Glucan from UDP-α-D-Glucose Catalyzed by a *Phaseolus aureus* Enzyme. A. F. CLARK AND C. L. VILLEMEZ 371
Photophosphorylation and Carbon Dioxide Fixation by Chloroplasts Isolated from *Populus deltoides*. RUBÉN HERNÁNDEZ-GIL AND MICHAIL SCHAEDLE 375
Relationship between Ethylene and the Growth of *Ficus sycomorus*. M. ZERONI, S. BEN-YEHOSHUA, AND J. GALIL 378
Physiology of Oil Seeds. IV. Role of Endogenous Ethylene and Inhibitory Regulators during Natural and Induced Afterripening of Dormant Virginia-type Peanut Seeds. D. L. KETRING AND P. W. MORGAN 382
Transport of Sodium into the Xylem Exudate of Tobacco. A. WALLACE, A. M. ABOU-ZAMZAM, AND R. T. MUELLER 388
Studies on Chloroplast Development and Replication in *Euglena*. III. A Study of the Site of Synthesis of Alkaline Deoxyribonuclease Induced during Chloroplast Development in *Euglena gracilis*. JAMES M. EGAN, JR. AND EDGAR F. CARELL 391
Equilibrium Constants and Photosynthetic Enhancement. JAMES M. PICKETT 396
Stimulation by Ethylene of Chlorophyll Biosynthesis in Dark-grown Cucumber Cotyledons. RUTH GRENE ALSCHER AND PAUL A. CASTELFRANCO 400
The Ultrastructure of Chloroplasts in Mineral-deficient Maize Leaves. J. D. HALL, R. BARR, A. H. AL-ABBAS, AND F. L. CRANE 404
Some Biochemical Characteristics of Chloroplasts from Mineral-deficient Maize. TADEUSZ BASZYNSKI, JERRY BRAND, RITA BARR, DAVID W. KROGMANN, AND FREDERICK L. CRANE 410
Coumarin-induced Tuber Formation on Excised Shoots of *Solanum tuberosum* L. Cultured *in Vitro*. G. F. STALLKNECHT 412
Promotion of Cell Elongation in *Avena* Coleoptiles by Acetylcholine. MICHAEL L. EVANS 414
Auxin Control for Orientation of Pea Roots Grown on a Clinostat or Exposed to Ethylene. CHARLES J. LYON 417

Number 4. October

Nitrate Reductase and Chlorate Toxicity in *Chlorella vulgaris* Beijerinck. L. P. SOLOMONSON AND BIRGIT VENNESLAND 421
Endogenous Metabolism of Fungus Spores. Stimulation by Physical and Chemical Means. G. R. MANDELS AND ANNE MAGUIRE 425
Role of Protein Synthesis in the Senescence of Leaves. II. The Influence of Amino Acids on Senescence. COLIN MARTIN AND KENNETH V. THIMANN 432
Cell Wall Regeneration around Protoplasts Isolated from *Convolvulus* Tissue Culture. RANDALL K. HORINE AND ALBERT W. RUESINK 438
The Activity of Ribulose Diphosphate Carboxylase in Extracts of *Gonyaulax polyedra* in the Day and the Night Phases of the Circadian Rhythm of Photosynthesis. KAREN J. BUSH AND BEATRICE M. SWEENEY 446
Effects of Germination on Na^+-K^+-stimulated Adenosine 5′-Triphosphatase and ATP-dependent Ion Transport of Isolated Membranes from Cotyledons. Y. F. LAI AND J. E. THOMPSON 452
Photoregulation of Nicotinamide Adenine Dinucleotide Kinase Activity in Cell-free Extracts. TAKAFUMI TEZUKA AND YUKIO YAMAMOTO 458
Cytochemical Localization of Catalase in Glyoxysomes Isolated from Maize Scutella. GIOVANNA P. LONGO, CAROLA DRAGONETTI, AND CLAUDIO P. LONGO 463
The Regulatory Properties of Purified *Phaseolus aureus* Sucrose Synthetase. DEBORAH PIERSON DELMER 469
The Role of a D-Mannosyl-Lipid as an Intermediate in the Synthesis of Polysaccharide in *Phaseolus aureus* Seedlings. DAVID L. STORM AND W. Z. HASSID 473
Studies of L-Cysteine Biosynthetic Enzymes in *Phaseolus vulgaris* L. IVAN K. SMITH 477
L-Phenylalanine Ammonia-lyase (Maize). Partial Purification and Response to Gibberellic Acid and Cycloheximide of L-Phenylalanine and L-Tyrosine Ammonia-lyase Activities. PHILIP D. REID, EVELYN A. HAVIR, AND HERBERT V. MARSH, JR. 480
Nitrate Absorption and Assimilation in Ryegrass as Influenced by Calcium and Magnesium. M. A. MORGAN, W. A. JACKSON, AND R. J. VOLK 485
Two Components of Auxin Transport. R. K. DELA FUENTE AND A. C. LEOPOLD 491
Biochemical Pathway of Stress-induced Ethylene. A. L. ABELES AND F. B. ABELES 496
Auxin Activity of 3-Methyleneoxindole in Wheat. P. S. BASU AND V. TULI 499
Enzymatic Dehydration of 3-Hydroxymethyloxindole. P. S. BASU AND V. TULI 503
The Binding of Indole-3-acetic Acid and 3-Methyleneoxindole to Plant Macromolecules. P. S. BASU AND V. TULI 507

Ethylene-induced Pea Internode Swelling. Its Relation to Ribonucleic Acid Metabolism, Wall Protein Synthesis, and Cell Wall Structure. W. R. EISINGER AND S. P. BURG 510
Temperature Dependence of Photosynthesis in Cotton. JOY DOWNTON AND R. O. SLATYER 518
Phytochrome-controlled Nyctinasty in *Albizzia julibrissin*. V. Evidence against Acetylcholine Participation. RUTH L. SATTER, PHILIP B. APPLEWHITE, AND ARTHUR W. GALSTON 523

Number 5. November

Comparative Freezing Patterns in Stems of Cherry and Azalea. FRANK G. DENNIS, JR., GLEN P. LUMIS, AND C. ROBERT OLIEN 527
Location of Glycoproteins That Contain Glucosamine in Plant Tissues. R. M. ROBERTS, J. J. CETORELLI, E. G. KIRBY, AND MARY ERICSON 531
Content of Adenosine Phosphates and Adenylate Energy Charge in Germinating Ponderosa Pine Seeds. TE MAY CHING AND KIM K. CHING 536
Isolation and Characterization of Membranes from the Cultivated Mushroom. R. BARRY HOLTZ, PETER S. STEWART, STUART PATTON, AND LEE C. SCHISLER 541
Photosynthetic Properties of Permaplasts of *Anacystis*. BAILEY WARD and JACK MYERS 547
Effects of Proline and Carbohydrates on the Metabolism of Exogenous Proline by Excised Bean Leaves in the Dark. CECIL R. STEWART 551
Auxin-induced Changes in *Avena* Coleoptile Cell Wall Composition. WAYNE LOESCHER AND DONALD J. NEVINS 556
Freezing Injury in Potato Leaves. N. P. SUKUMARAN AND C. J. WEISER 564
Biocarbonate Effect on the Photophosphorylation Catalyzed by Chromatophores Isolated from *Chromatium* Strain D. XII. Structure and Function of Chloroplast Proteins. T. MURAI AND T. AKAZAWA 568
Aftereffects of Low and High Temperature Pretreatment on Leaf Resistance, Transpiration, and Leaf Temperature in *Xanthium*. B. G. DRAKE AND F. B. SALISBURY 572
An Explanation for the Difference in Photosynthetic Capabilities of Healthy and Beet Yellows Virus-infected Sugar Beets (*Beta vulgaris* L.) A. E. HALL AND R. S. LOOMIS 576
Polyribosomes from Peas. An Improved Method for Their Isolation in the Absence of Ribonuclease Inhibitors. ERIC DAVIES, BRIAN A. LARKINS, AND ROBERT H. KNIGHT 581
The Level of Phytohormones in Monoecious and Gynoecious Cucumbers as Affected by Photoperiod and Ethephon. J. RUDICH, A. H. HALEVY, AND N. KEDAR 585
Acid-bath Phosphorylation in Heptane-extracted Chloroplasts. C. D. MILES 591
Effects of Cytokinins on the Respiration of Soybean Callus Tissue. THOMAS S. MOORE, JR., AND CARLOS O. MILLER 594
A Possible Role of Divalent Manganese Ions in the Photoinduction of Phenylalanine Ammonia-Lyase. G. ENGELSMA 599
Chloride Accumulation by Mung Bean Root Tips. A Low Affinity Active Transport System at the Plasmalemma. DONALD F. GERSON AND RONALD J. POOLE 603
Influence of Decenylsuccinic Acid on Water Permeability of Plant Cells. O. Y. LEE, ED. J. STADELMANN, AND C. J. WEISER 608
N^6-(Δ^2-Isopentenyl)adenosine: Its Occurrence as a Free Nucleoside in an Autonomous Strain of Tobacco Tissue. W. H. DYSON AND R. H. HALL 616
Translocation and Metabolism of Ricinine in the Castor Bean Plant, *Ricinus communis* L. G. R. WALLER AND L. SKURSKY 622
Immunological Comparisons of Chymotrypsin Inhibitor I among Severa lGenera of the Solanaceae. S. GURUSIDDAIAH, T. KUO, AND C. A. RYAN 627
Use of Fluid Fluorocarbons to Study Freezing in Plant Tissues. N. P. SUKUMARAN, H. QUAMME, AND C. J. WEISER 632
The Contrast between Active Transport and Diffusion of Indole-3-acetic Acid in *Coleus* Petioles. YAW-PAN CHANG AND WILLIAM P. JACOBS 635
Enhanced Activity of the Soluble Ribonucleic Acid Polymerase from 2,4-Dichlorophenoxyacetic Acid-treated Maize Seedlings. MAX Q. ARENS AND ERNEST R. STOUT 640
Effect of Urea on Ammonium-dependent Synthesis of Carbamyl Phosphate during Spore Germination of *Geotrichum candidum*. I. BARASH, ILANA LOWY, AND S. POMERANTZ 642

Number 6. December

Phytochrome Control of Germination of *Rumex crispus* L. Seeds Induced by Temperature Shifts. R. B. TAYLORSON AND S. B. HENDRICKS 645
Synthesis and Turnover of Nitrate Reductase in Corn Roots. ANN OAKS, W. WALLACE, AND D. STEVENS 649
Further Comparative Studies of Pectin Esterase in Relation to Leaf and Flower Abscission. HAROLD E. MOLINE, CLIFFORD E. LAMOTTE, CARL GOCHNAUER, AND ALAN MCNAMER 655
Studies on Phytoalexins. The Relationship between Actinomycin D and Ribonucleic Acid Synthesis during the Induction of Phaseollin in the French Bean (*Phaseolus vulgaris* L.). D. R. BIGGS 660
Abscisic Acid in Relation to Mineral Deprivation. Y. MIZRAHI AND A. E. RICHMOND 667
Polysome Formation in Light-controlled Dormancy. ROSEMARY C. MITCHELL AND T. A. VILLIERS 671
Iron-stress Response in Mixed and Monocultures of Soybean Cultivars. J. E. AMBLER AND JOHN C. BROWN 675
Proline Content and Metabolism during Rehydration of Wilted Excised Leaves in the Dark. CECIL R. STEWART 679
Regulation of Salt Respiration in Carrot Root Slices. P. B. ADAMS AND K. S. ROWAN 682

Phytochrome-mediated Electric Potential Changes in Oat Seedlings. IAN A. NEWMAN AND WINSLOW R. BRIGGS 687
Effect of γ-Irradiation on the Biosynthesis of Carotenoids in the Tomato Fruit. CHERRY N. VILLEGAS, C. O. CHICHESTER, L. C. RAYMUNDO, AND K. L. SIMPSON 694
The Cupric Ion as an Inhibitor of Photosynthetic Electron Transport in Isolated Chloroplasts. ARTURO CEDENO-MALDONADO, J. A. SWADER, AND ROBERT L. HEATH 698
Cytokinins: Synthesis and Biological Activity of Geometric and Position Isomers of Zeatin. RUTH Y. SCHMITZ, FOLKE SKOOG, ANTHONY J. PLAYTIS, AND NELSON J. LEONARD 702
Localization of Crystals in Diseased Oats Treated with Uranyl Acetate. CAROL ZEMAN EASTON AND PENELOPE HANCHEY 706
Use of Uncoupling Acridine Dyes as Stoichiometric Energy Probes in Chloroplasts. RUUD KRAAYENHOF, SEIKICHI IZAWA, AND BRITTON CHANCE 713
Ethylene Synthesis in Lettuce Seeds: Its Physiological Significance. A. N. BURDETT 719
Induction of Indoleacetic Acid Synthetases in Tobacco Pith Explants. TSAI-YING CHENG 723
Metabolic Activities in Extracts of Mesophyll and Bundle Sheath Cells of *Panicum miliaceum* (L.) in Relation to the C_4 Dicarboxylic Acid Pathway of Photosynthesis. GERALD E. EDWARDS AND MARIA GUTIERREZ 728
Detergent Extraction of Enzymes from Tobacco Leaves Varying in Maturity. DONALD W. DE JONG 733
Elongation Responses of the Oat Shoot to Blue Light, as Measured by Capacitance Auxanometry. SOLON A. GORDON AND WILLIAM A. DOBRA 738
Bacteriochlorophyll Synthesis and the Ultrastructure of Wild Type and Mutant Strains of *Rhodopseudomonas spheroides*. A. E. BROWN, F. A. EISERLING, AND JUNE LASCELLES 743
Phytol and Bacteriochlorophyll Synthesis in *Rhodopseudomonas spheroides*. A. E. BROWN AND JUNE LASCELLES 747
Decrease of Glucose 6-Phosphate and 6-Phosphogluconate Dehydrogenase Activities in the Xylem of *Populus gelrica* on Budding. SHONOSUKE SAGISAKA 750
Water Stress Enhances Ethylene-mediated Leaf Abscission in Cotton. WAYNE R. JORDAN, PAGE W. MORGAN, AND THOMAS L. DAVENPORT 756
Ethylene: Role in Fruit Abscission and Dehiscence Processes. JOHN A. LIPE AND PAGE W. MORGAN 759
Ethylene: Response of Fruit Dehiscence to CO_2 and Reduced Pressure. JOHN A. LIPE AND PAGE W. MORGAN 765
Serological Characterization of the Glycolate-oxidizing Enzymes from Tobacco, *Euglena gracilis*, and a Yellow Mutant of *Chlorella vulgaris*. G. A. CODD AND G. H. SCHMID 769
pH Dependence and Cofactor Requirements of Photochemical Reactions in Maize Chloroplasts. D. G. BISHOP, KIRSTEN S. ANDERSEN, AND ROBERT M. SMILLIE 774
Reversible Abolition of Enhancement in Isolated Spinach Chloroplasts. JOHN SINCLAIR 778
Polar Indole-3-acetic Acid Diffusion in Nonliving and Model Systems. W. R. KRUL 784
Effects of Cycloheximide on Amino Acid Biosynthesis in Corn Roots. ANN OAKS AND F. J. JOHNSON 788
Complementation of Isolated Mitochondria from Several Wheat Varieties. R. ZOBL, G. FISCHBECK, F. KEYDEL, E. LATZKO, AND G. SPERK 790
